

STARBUCKS

Projectdesign

Starbucks added another establishment to their list, on a special location this time. The new coffee bar can be found below the *Central Library at Blaak, Rotterdam*.

Previously to the opening a big renovation took place. Hutten was asked to provide customized furniture in the corporate identity style, resulting in a warm, cozy space that invites you to have a nice cup of coffee! Among other things we provided tables, modern sofas, a bar, illuminated stairs and made sure everything was properly installed.

...A new addition on a special location...
