

## A FACELIFT

Sustainable design

*Dortmund University* started collaborating with Hutten years ago. The chairs that the university had chosen have stood the test of time so well that they've decided to keep them, but give them a fresh, new look. This way Hutten provides a sustainable and honest product, furniture not just for a few years, but *timeless design, that lasts a lifetime.*

By lowering the back, sanding and re-treating the wood, the chair got a facelift that we're very proud of and that will serve the students for many years to come.

*...Something old,  
something new...*
